

Manufacturing

With 60,000 sq feet of in-house manufacturing facilities available, Lowfield's are able to ensure your project is manufactured on time, every time. Our locality to the M54, M6 and M5 motorway networks enables fast distribution and availability of our products and services across the country.

Sustainability

Lowfield Timber Frames is committed to the use of sustainable and well managed forests. We are CATG Forest Products Certified which enables us to provide a full 'Chain of Custody' under the PEFC (Programme for the Endorsement of Forest Certification Schemes) therefore proving our raw materials were responsibly sourced.

“ *Lowfield Timber Frames products bring efficiency, simplicity and reliability to the construction process while meeting the demands of modern life, sustainability and safety.* ”

Timber Frame and SIPs

Lowfield Timber Frames is an established manufacturer of high quality, bespoke Timber Frame Kits and (SIPS) Structural Insulated Panel Systems, both of which can be used in the construction of residential houses, care homes, hotels as well as other commercial and industrial premises.

Tailored Solutions

Our unique position as one of the UK's only Timber Frame and SIPs suppliers places us in the enviable position of being able to specify and supply the right building system to satisfy our client's criteria albeit based simply on cost in today's ever changing financial climate, or a required performance specification to simply achieve current building regulations or the Governments Code For Sustainable Homes scheme etc.

NHBC Registered For Your Peace Of Mind

Customer Satisfaction

To ensure every project is designed, manufactured and erected to the highest possible standards, we are members of TRADA, the UKTFA and UKSIPS associations. We are an official Kingspan TEK Delivery partner. We also have an ISO9001-2008 system in place to ensure that our processes and procedures are maintained and policed as required by this strict externally audited quality management system. We also have a team of dedicated field based Contracts Managers who ensure that quality is maintained on site throughout the installation process.

Experienced

With over 18 years experience supplying our engineered timber products to numerous customers from self builders and local small builders to large regional and national developers, we have earned a reputation for service, quality and excellence in all areas. As demand for high quality energy efficient low maintenance homes has grown, quite simply so have we!

Speed and Convenience

Our services range from the simple supply only of a small local extension, through to the full on site assembly of a Timber Frame or SIP Building System on a large bespoke project, prestigious self build or a multiple unit residential site anywhere in the UK. In addition to this we are also able supply a comprehensive range of ancillary components such as wall ties, lintels, insulation, breather membranes and vapour control layers.

Factory Built Kits For Predictable Lead Times
